### Installation

- Can be installed in either concrete or timber floors
- The opening in the floor should be at least 400mm x 400mm x 400mm
- When hole is ready safe should be lowered into position and supported so cover plate is level with floor surface
- A strong mix of concrete [600 psi compression strength] is poured into the opening and compacted
- Finish surface with sand and cement mix & float until level
- Safe door should be removed during installation
